PERATRUM

Tramadol BP + Paracetamol BP

Compositions:
Each film coated tablet contains Tramadol HCl BP 37.5 mg & Paracetamol BP 325 mg .

Pharmacology:
Tramadol is a centrally acting synthetic opioid analgesic. Two complementary mechanisms apear applicable : binding to μ-opioid receptors and weak inhibition of reuptake of nor epinephrine and serotonin. These mechanisms may contribute to the overall analgesic profile of tramadol. Paracetamol is a non-opioid, non-salicylate analgesic and antipyratic.

Dosage And Administration:
For the management of pain, the recommended dose is 1 to 2 tablets every 6 hours as needed for pain relief upto a maximum of 8 tablets per day. Peratrum tablet can be administered without regard to food.
